# **Johnstone Supply Publishes New Edition of Catalog, Further Expands Regional Offerings**

*(Portland, OR – May, 2009)* – Johnstone Supply has announced the rollout of the latest edition of its industry-leading print catalog, showcasing significant new product offerings. The 2009 catalog features over 3,000 new products from industry leading manufacturers, further cementing its superior selection and range of HVAC/R parts, supplies and equipment. Now totaling over 30,000 products, the catalog has been strategically enhanced to include even more region-specific items addressing the particular needs of contractors in various regions of the country.

These catalog improvements mirror the larger Johnstone effort establishing regional distribution centers to stock these region-specific items, as well as improving delivery times at the local level. Even more products are available for view and purchase from the online version of the Johnstone Catalog, which has also expanded and currently features more than 45,000 products available for ordering from local Johnstone stores.

For over 55 years the Johnstone Supply catalog has established itself as unmatched in the industry in terms of available products and top-quality lines. “We always want to make it as easy as possible to supply our customers with what they need to get the job done every time,” said Johnstone Supply President & CEO Gary Daniels. “The 2009 edition of the Johnstone catalog is the most comprehensive resource yet, and every one of those products is backed up at our local stores with terrific service and expert counter staff.”

###

Johnstone Supply is the leading cooperative wholesale distributor in the HVACR industry, with over \$1 billion in annual sales and 340 independently owned store locations across America. Johnstone Supply offers superior customer service, technical advice and training seminars, and prints an annual catalog featuring more than 30,000 HVACR parts, supplies and equipment. A searchable online catalog is also available, with the ability to order directly from local stores at [www.JohnstoneSupply.com](http://www.JohnstoneSupply.com).
